**RIZAYEV JASUR ALIMDJANOVICH**

**Doctor of Medical sciences, Professor**

# Rector

Jasur Alimdjanovich Rizayev is a highly accomplished physician, who completed his residency in Dentistry from the First Tashkent State Medical Institute in 1996. He worked as a laboratory technician, assistant, and associate professor at the Department of "Therapeutic Dentistry" from 1997 to 2007, where he gained extensive experience in treating patients. Throughout his career, Jasur has shown a deep commitment to his work, a thirst for knowledge and innovation, and has earned the respect of his patients and colleagues.

In recognition of his organizational skills and expertise, Jasur was appointed as the head physician assistant at Tashkent Medical Academy's 3rd clinic in 2007. He has since gone on to become the Director of the Uchtepa District Health Department in 2009 and was nominated as the top doctor of the 3rd TMA clinic in 2011. In 2016, Jasur was appointed as the rector of the Tashkent State Institute of Dentistry.

Jasur has received numerous awards and recognitions for his exceptional contributions to the field of healthcare. He was awarded the chest badge "Excellent specialist in Healthcare of the Republic of Uzbekistan" in 2013 by the Minister of Health of the Republic of Uzbekistan. He has also been honored with chest badges on "20th Anniversary of Independence" and "25th Anniversary of Independence." Jasur has been the head of the Academic Council for Academic Degrees since 2018, where he has overseen the defense of 51 theses, including 18 doctors of medical sciences (DSc) and 33 doctors of philosophy of medicine (DPSM) (PHD).

Jasur is a disciplined and hardworking individual who is constantly striving to improve himself and his abilities. He sets clear goals and tasks for himself and his employees, and ensures their timely completion. He is known for his initiative and creativity in solving problems and creating a healthy work environment. Jasur is a member of several prestigious professional organizations, including the American Dental Association, the European Association of Cardiology, and the Council of the

**AMINOV ZAFAR ZAYIROVICH**

**Doctor of Medical Sciences**

# **Vice-Rector**

## **For International Cooperation**

Zafar Zayirovich Aminov graduated with a medical degree from Samarkand State Medical Institute in 2002. From 2001 to 2003, he worked as an assistant to the President of the Organization of Medical Students. In 2008, he became a monitoring and evaluation expert at Project HOPE International, where he worked until 2010, while pursuing his Master's degree at the State University of New York. From 2010 to 2013, he continued his studies as a doctoral student at the same university.

In 2013, Aminov became the Director of the Department of Public Health, General Hygiene, and Environment at Samarkand State Medical Institute. He then went on to serve as Vice-Rector for Academic Lyceums and Colleges from 2014 to 2018, and as Head of the Department of Public Health, General Hygiene, and Ecology, as well as part-time Head of International Relations, from 2018 to 2020. Since 2020, he has been serving as the Vice-Rector for International Cooperation at Samarkand State Medical University.

Throughout his career, Aminov has demonstrated a strong passion for knowledge, creativity, and commitment to his work. He has been widely appreciated by patients, department, and staff members. As Vice-Rector for International Cooperation, his responsibilities include reviewing and approving documentation for university officials traveling on overseas business trips, organizing seminars and round tables for university professors, staff, and students based on project analysis, evaluating and analyzing university agreements, contracts, and procedures with overseas partners, and coordinating papers with appropriate organizations if necessary.

## **DR. SOBIRJON MAMARAJABOV**

**Dean Of The Faculty Of International Education.**

Dr. Sobirjon Mamarajabov, a highly respected academician and administrator, has been appointed as the Dean of the Faculty of International Education at Samarkand State Medical University. He is widely credited for the university's transformation into one of the leading institutions of higher learning in the region. As Dean, he will be responsible for the academic leadership of the university and will work closely with the Vice-Chancellor to continue building on Samarkand's reputation as a world-class institution.

Dr. Sobirjon is a well-respected scholar in the field of education, with a focus on international comparative education and educational policy. He also has extensive experience in senior administrative roles in higher education. He is a strategic thinker and an effective communicator with a proven track record in leading complex organizations.

Dr. Sobirjon is committed to providing students with the best possible education and has been working tirelessly to formulate a vision for the future of the institution. His vision is to make Samarkand University a world-class center of learning, research, and innovation. To achieve this goal, he has set forth a number of initiatives, including recruiting the best and brightest students from around the globe, attracting top-tier faculty members, and investing in cutting-edge research facilities and programs.

Under his leadership, Samarkand State Medical University is poised to become one of the leading universities in the world. We extend our warm wishes and gratitude to him for everything he has done and will continue to do for the university

**MRINAL KUMAR ROY****MBBS, (MD)**

# Message

## From The Managing Director

### Dear Students and Parents

We would like to extend our sincerest gratitude to you for choosing DREAM MBBS STUDY ABROAD LLP as your trusted partner in selecting and enrolling in medical universities. We are honored to be a part of your academic journey, and we deeply appreciate the trust you have placed in us.

We understand that selecting the right university for pursuing a medical degree can be an overwhelming task, and we are delighted that we could assist you in making the best decision. We take immense pride in our track record of successfully guiding our alumni to excel in their careers and make a meaningful impact in the medical field.

We are confident that with your dedication and hard work, you will achieve tremendous success in your academic endeavors and beyond. We wish you a bright and prosperous future, filled with opportunities and accomplishments.

At DREAM MBBS, we strive for excellence in everything we do, and we are committed to providing you with top-notch service. We will continue to make ongoing efforts to improve and enhance our services, and we pledge to be here for you every step of the way.

Once again, thank you for choosing DREAM MBBS STUDY ABROAD LLP. It is a privilege to be a part of your academic journey, and we eagerly anticipate serving you in the future.

With warm regards,

Mrinal Kumar Roy

Director

DREAM MBBS STUDY ABROAD LLP

# ABOUT UNIVERSITY

## Samarkand State Medical University

Samarkand State Medical University, originally established as "State Uzbek Medical Institute" 90 years ago on May 7, 1930, has evolved into one of the most esteemed medical higher educational institutions not only in Uzbekistan but also throughout the entire Central Asian region. By a resolution of the republic government (Resolution of the Council of People's Commission of Uzbekistan No. 80), the university was founded to address the region's need for an autonomous medical higher education institution.

Following Uzbekistan's independence, Samarkand State Medical Institute (now University) underwent significant developments. In 1997, the government introduced the "National Training Program," followed by the State Health Care Reform Program in 1998. These initiatives led to the establishment of the Faculty of Higher Nursing in 1999, the College of Medical Pedagogy in 2001, and the Faculty of Stomatology, Medical Preventative Medicine, Medical Biology, and Pharmacy in 2005. Students enrolled in a new course called "Traditional Medicine" in the subsequent years.

The university has also established collaborations with prominent foreign universities, including Volga Medical Research University, Chuvash National University named after I.N. Ulyanov (Russia), Ternopol National Medical University named after Y.B. Gorbachevsky (Ukraine), National Louis University Graduate School of Business (Poland), and Belarusian State Medical University (Republic of Belarus). These partnerships enable joint educational programs leading to Bachelor's and Master's degrees.

Moreover, in collaboration with the Korean side, personnel training under the second higher education program is being actively pursued. Beginning with the academic year 2020-2021, students from the Republic of India are being admitted for higher medical study at the institution.

The strategic decision of Uzbekistan's President Shavkat Mirziyoyev, dated April 1, 2022, to establish Samarkand State Medical University based on the Samarkand State Medical Institute signifies the institution's commitment to embody the most advanced achievements of local and international experience. The university has a strong scientific and pedagogical capacity, diverse material and technological resources, and a long history of training skilled medical professionals.

According to the presidential decree, the educational process should focus on developing practical skills through the widespread implementation of advanced pedagogical technologies, curricula, and innovative materials based on international educational standards. The university aims to create an environment that combines theoretical knowledge and practice in the clinic and the educational base, and it seeks to develop academic mobility programs for students, teachers, and researchers working with foreign medical universities. The university is also committed to conducting fundamental, applied, and innovative research to address existing problems in medical practice and gradually introduce the concept of "University 3.0," which integrates medical education, science, and practical healthcare with real sectors of the economy.

Today, Samarkand State Medical University offers instruction across nine faculties and nine Bachelor's degrees, providing a comprehensive medical education to students from diverse backgrounds.

# GENERAL INFORMATION

Samarkand State Medical University holds a distinguished position as one of the oldest and most prestigious medical institutions in Central Asia. Located in the historic city of Samarkand, Uzbekistan, the university has earned a reputation for providing world-class medical education, research, and healthcare services. The campus of Samarkand State Medical University is a blend of rich history and modern infrastructure, reflecting the diverse cultural heritage of the region. The university offers state-of-the-art facilities, including well-equipped lecture halls, modern laboratories, advanced research centers, and a comprehensive library containing an extensive collection of medical literature. The university provides an array of medical programs, including undergraduate, postgraduate, and doctoral degrees. Courses are offered across various disciplines, such as general medicine, dentistry, pharmacy, and nursing, ensuring that students receive a comprehensive and well-rounded education. The curriculum is designed in accordance with international standards, and the medium of instruction is English, making it accessible to students from different linguistic backgrounds. Samarkand State Medical University is renowned for its highly qualified and experienced faculty, who are experts in their respective fields. The university maintains a low student-to-faculty ratio, ensuring personalized attention and support for each student. The teaching staff is actively engaged in cutting-edge research, regularly publishing their findings in international medical journals. In addition to academic excellence, the university emphasizes practical training and hands-on experience. Students have the opportunity to participate in clinical rotations at various affiliated hospitals and healthcare centers, allowing them to gain real-world experience in patient care, diagnostics, and treatment. Samarkand State Medical University is recognized by various international medical organizations, including the World Health Organization (WHO), the Foundation for Advancement of International Medical Education and Research (FAIMER), and the National Medical Commission (NMC) of India. Graduates from the university are eligible to practice medicine in numerous countries after fulfilling the respective licensure requirements. With a strong commitment to nurturing the next generation of medical professionals, Samarkand State Medical University offers a world-class education that combines theoretical knowledge, practical skills, and invaluable experience, preparing students to excel in the global healthcare landscape. Beyond its academic and practical offerings, Samarkand State Medical University also fosters a vibrant and diverse student community, creating an enriching environment for personal and professional growth. The university boasts numerous student clubs, organizations, and sports facilities, encouraging students to explore their interests and passions outside the classroom. Furthermore, the institution organizes regular seminars, conferences, and workshops featuring distinguished speakers and experts from the medical field, offering students the opportunity to learn from and engage with leaders in their respective areas of expertise. International exposure is another significant aspect of the educational experience at Samarkand State Medical University. The university maintains partnerships and collaborations with numerous medical institutions and organizations around the globe, facilitating student exchange programs, joint research projects, and collaborative learning opportunities. These international connections allow students to broaden their perspectives, acquire a global understanding of healthcare challenges, and develop the skills necessary to navigate the increasingly interconnected world of medicine. To support its diverse student body, Samarkand State Medical University provides comprehensive student services, including career counseling, academic guidance, and assistance with accommodation and other logistical matters. The university is dedicated to ensuring that all students have access to the resources and support they need to succeed in their academic journey and achieve their career aspirations.

## Samarkand State Medical University

DREAM MBBS

### The University Faculties Include:-

"Faculty of medicine"  
"Faculty of pediatrics"  
"Faculty of medical pedagogy"  
"Faculty of higher nursing"  
"Faculty of dentistry"  
"Faculty of pharmacy"  
"Faculty of medical Prevention,  
Public Health and Medical Biology"  
"International Faculty"

### University Academic Programmes Include The Following:-

"General Medicine"  
"Paediatrics"  
"Vocational education (medical practice)"  
"Graduate nursing"  
"Dentistry"  
"Medical Preventive Medicine"  
"Pharmacy"  
"Biomedical science"  
"Traditional Medicine"  
"Clinical Psychology"  
"Management: Health Care Management"

These faculties carry out their operations through 74 departments, 1190 computer-equipped classrooms, and 75 multimedia classrooms. There is an academic lycée at Samarkand State Medical University. Over 2200 Indian students are now enrolled in Samarkand State Medical University.

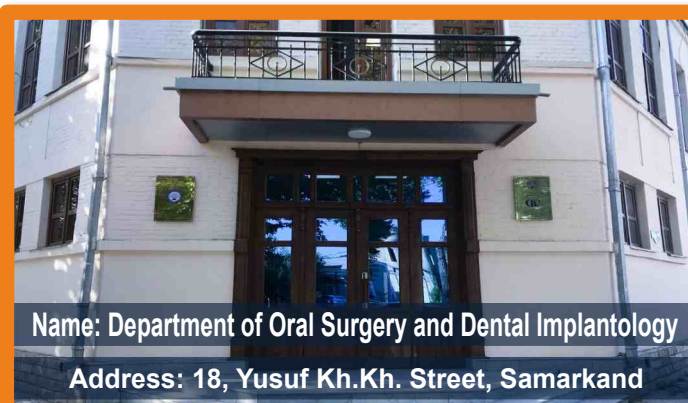

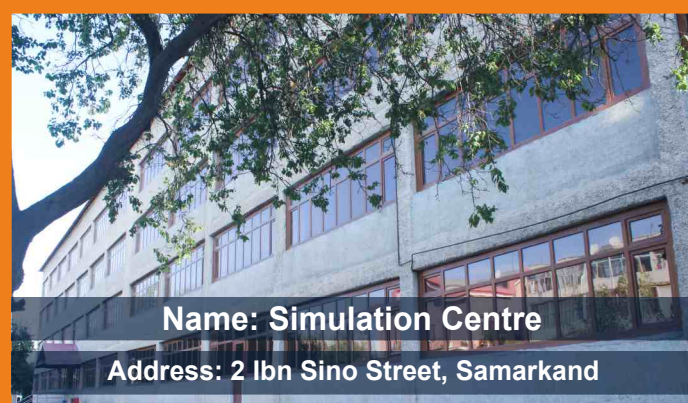

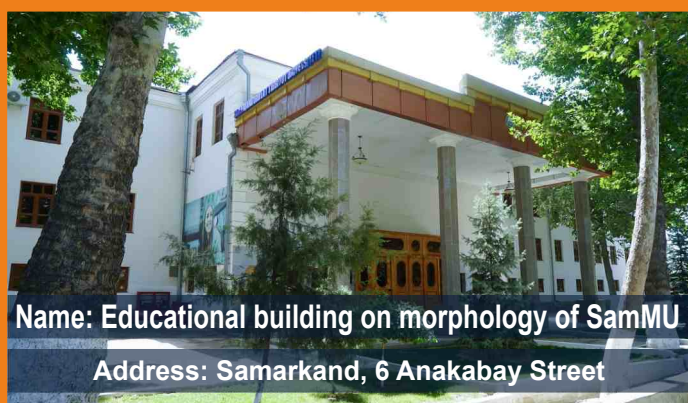

# ADMISSION PROCEDURE

- Submit scanned copies of your 10<sup>th</sup> and 12<sup>th</sup> grade results, NEET scores, passport, or Aadhaar card (if your passport is pending) to your assigned counselor via their official email for verification purposes.
- Remit the registration fee to the company's account, or make an online payment through the company's website.
- Validate your payment and receive a payment receipt from your counselor.
- Once the university issues the admission letter, your counselor will email it to you.
- Dispatch the original copies of your 10th and 12th grade results and passport via courier to our office address: DREAM MBBS STUDY ABROAD LLP, 1218, 12th Floor, Ithum Tower-B, Sector 62, Noida, Uttar Pradesh, 201301, or submit them in person at the aforementioned address.
- Remit the documentation fees to the company's account, or make an online payment via the company's website.
- Verify your payment and receive a payment receipt from your counselor.
- We will initiate the documentation process and submit the necessary documents to facilitate the issuance of the invitation letter. Your counselor will share the invitation letter after the relevant authority issues it.
- Remit the visa fees to the company's account, or make an online payment via the company's website.
- Validate your payment and obtain a receipt from your counselor.
- We will submit your passport, along with all other required documents, to the embassy for visa processing. Once your visa is issued, your counselor will inform you.
- Our agent will collect the visas from the embassy.
- Your counselor will inform you about the travel arrangements, which will be organized by the company and the university, taking several factors into consideration.
- A cohort of students will travel together to fulfill their dreams of studying abroad.
- Prior to receiving the original hard copies of your documents, remit the service charges to the company's account or make an online payment through the company's website.
- Validate your payment and obtain a receipt from your counselor.
- After successful verification of your payment receipt, you will receive your passport and all other academic documents from your counselor at our office.
- We extend our best wishes for your future endeavors. DREAM MBBS will accompany you on your journey, and will coordinate all necessary arrangements to ensure a pleasant and comfortable experience

# LIBRARY

The Medical Library of Samarkand State Medical University was established in 1934 and initially situated within the premises of the university's multi-profile clinic (Clinic No.1). From the beginning, the library faced various challenges, such as organizing and standardizing its book collection and painstakingly creating catalogues. In its early years, the library's collection comprised around 30,000 printed materials.

Several notable individuals, including Prof. G.G. Abdullaev, P.N. Karlenko, F.M. Golub, I.P. Mishchenko, P.M. Isayev, F.I. Shevchenko, Associate Professors H.R. Farkhadi, M. Asadulin, M.G. Iren, and D.H. Rakhmanov, contributed literature to the library's collection. During World War II, the S.M. Kirov Military Medical College was evacuated to Samarkand, leaving behind unique and uncommon editions as a form of legacy. Many of these editions are considered rare, as most of the books date back to the nineteenth and early twentieth centuries.

The library's collection includes the renowned "Encyclopaedia of Medical Sciences" by F.A. Brockhaus and I.A. Efron (1890-1907), the "Real Encyclopaedia of Medical Sciences" (1891), and works on anatomy, physiology, surgery, obstetrics, gynecology, as well as doctoral and candidate theses. The writings of notable medical science founders, such as Sechenov, Pavlov, and Pirogov, are well represented in the collection and hold significant cultural and scientific value.

In 1939, the library's collection comprised 37,000 books, growing to 78,000 by 1949. At present, the library houses over 350,000 books. Starting with merely 200 readers, including 105 students and 56 instructors, the library now serves more than 8,000 users. The Medical Library of Samarkand State Medical University plays a vital role in fostering knowledge advancement.

Currently, the library, as part of the Information and Resource Centre (IRC), is regularly updated with the latest medical, related, and other materials published by renowned national and international publishing companies. The IRC fund at Samarkand State Medical University features nearly 350,000 printed units of academic, scientific, pedagogical, methodological, fiction, and international literature. The collection includes 110,950 copies of educational literature and 182,861 copies of scientific literature. Departments have access to essential textbooks and study aids in English and German, alongside materials in Uzbek (Latin and Cyrillic) and Russian. The international literature collection boasts over 10,000 printed works.

## FOREIGN STUDENTS STUDYING AT THE UNIVERSITY

Currently, over 3,000 international students are enrolled at Samarkand State Medical University, with around 2,200 of them coming from India. The university started admitting international students to its medical programs in 2019. In the first year, less than 100 international students were recruited, but this number saw a significant increase in just over three years. In 2022 alone, Samarkand State Medical University welcomed over 900 Indian students. The rapid influx of Indian students from Ukraine, due to the Russia-Ukraine conflict, contributed to the university's growing popularity and demand among foreign students, particularly Indians, who were drawn to its education system and licensing process. Samarkand State Medical University has earned a strong reputation among international students for its high-quality education and clinical experience. International students are recruited through the university's official partners, one of which is DREAM MBBS STUDY ABROAD LLP. There are ample dormitory accommodations available for international students. However, many opt for apartments to ensure privacy, and these are readily available to foreign nationals without discrimination. Uzbek people are known for their hospitality, which adds to the welcoming environment for international students. The university's accreditations from prestigious organizations also attract international students to the institution.

## INTERNATIONAL STUDENT SAFETY

The safety of international students studying at higher education institutions in Uzbekistan is fully protected by the Republic of Uzbekistan's Constitution and other legislation. As such, foreign students are required to comply with the country's Constitution and legal framework. Samarkand State Medical University maintains a dedicated police unit to assist and advise students in the event of an emergency. The university has appointed a sergeant who is in constant communication with the dean of the foreign faculty to keep the university informed about students' whereabouts and prevent potential risks. International students are not allowed to leave the dormitory after 10 p.m. during the summer and 9:30 p.m. during the winter. If students living in apartments are found wandering the city late at night, the sergeant informs the respective dean, and strict measures are taken the next day to prevent future incidents. In case of an emergency, Indian students who are new to the city and unsure of what to do can contact DREAM MBBS STUDY ABROAD LLP through their official WhatsApp number +919835070170 (24/7) or call their toll-free number 18002020041 (24/7) for assistance. A representative and team member will be dispatched immediately to ensure everything is alright, and the relevant authorities will be notified at the same time to guarantee the safety and security of every Indian student.

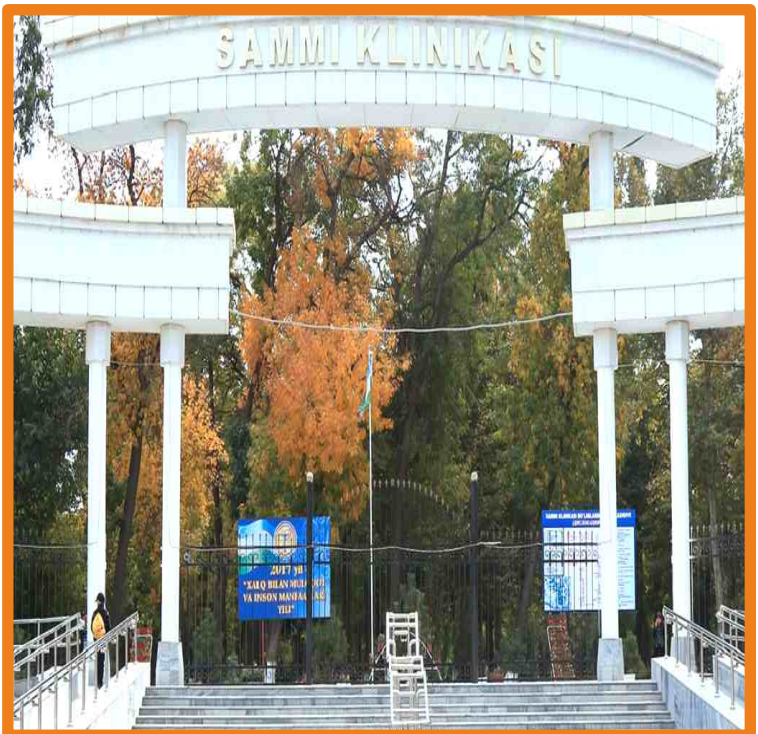

## CLINIC OF SAMARKAND STATE MEDICAL UNIVERSITY

### 1. Clinic 1 (Clinic SamMI)

SamSMU's Multidisciplinary Clinic (1st clinic) is a pioneer in Central Asia as one of the region's first significant interdisciplinary hospitals. Construction began in 1926 following cutting-edge designs of the time and commenced operations in 1929 as the "Republican Hospital," when Samarkand was Uzbekistan's capital. In 1930, with the founding of the Uzbek State Medical Institute in Samarkand, the Republican Hospital was transferred to the Institute and granted clinic status. As a vital component of the University, SamSMU's multifunctional clinic (1st clinic) serves as the primary educational and scientific-treatment foundation for training medical staff. Over the years, the clinic has undergone significant changes during its independence, including departmental reforms and updates, extensive building repairs and restoration, and the strengthening of its material and technological infrastructure. Over 300 state-of-the-art medical devices from countries like Japan, Germany, Russia, the United States, South Korea, China, and the United Kingdom have been installed. The Multidisciplinary Clinic (1st clinic) at Samarkand State Medical University houses 17 clinical departments that offer comprehensive conditions for mastering clinical knowledge, acquiring practical skills, and conducting research activities. Today, the multifunctional clinic (1st clinic) serves as a modern medical and diagnostic center for the southeastern and northwestern regions of the country. The clinic caters to 19,000 in-patients and over 100,000 out-patients annually, performs 3,000-3,500 births, and conducts more than 6,000 surgical interventions for patients from various regions of Uzbekistan, as well as citizens from neighboring republics. Additionally, over 500,000 laboratory tests and 100,000 Xray, ultrasound, endoscopic, and other functional tests are performed each year. The hospital's name has changed several times throughout its history, adapting to the needs and circumstances of the time. However, its role as the university's primary teaching and research-treatment base, and its prominence and importance in the public's consciousness as a national hospital, have remained constant. The primary objective of SamSMU's Multidisciplinary Clinic (1st clinic) is to provide university students with the necessary conditions to gain theoretical knowledge and practical skills in clinical disciplines and to offer quality inpatient and outpatient care to Uzbekistan's citizens and non-residents, in accordance with the Ministry's established procedures.

## 2. Clinic 2 (Center For Pediatric Surgery)

In 1990, Prof. A. Shamsiev led the establishment of the Multidisciplinary Specialized Centre for Children's Surgery, commonly known as "Clinic 2," at SamSMU. Since 2013, Professor Zhamshid Azamatovich Shamsiev has served as the clinic's chief physician. Today, the Multidisciplinary Specialized Centre for Pediatric Surgery (2nd Clinic) at Samarkand State Medical University is a specialized multidisciplinary research clinical institution, providing high-quality round-the-clock medical care for children in the Samarkand, Jizzakh, Navoi, Bukhara, Kashkadarya, Surkhandarya, and Khorezm regions. The hospital also serves as a world-class methodological center for various critical areas in pediatric surgery. Each year, approximately 21,000 patients visit the clinic, with over 10,000 of them requiring hospitalization. The clinic performs more than 8,000 complex plastic and reconstructive procedures on the heart, lungs, liver, intestines, organs of the urogenital system, and the musculoskeletal apparatus. For the first time in the Samarkand region's pediatric surgical practice, the center has introduced operations for congenital heart diseases, bronchiectatic disease, funnel chest deformity, liver cirrhosis, congenital diseases of the urogenital system, malformations of the large intestine, peptic ulcer and duodenal ulcer, laparoscopic and thoracoscopic operations, endoscopic transurethral cystoscopic stenting of the ureter and renal pelvis, endocollagenoplasty for vesicoureteral reflux, sclerotherapy for varicocele in children, as well as bronchoscopy, bronchography, plasmapheresis, splenosorption, ozone therapy, and more. The clinic maintains strong scientific relationships with respected international medical centers, enabling its professionals to participate in international scientific symposia for continued education. In 2016, the clinic's team became the first Central Asian members of the Endoscopic and Laparoscopic Surgical Association of Asia (ELSA). Specialists from the clinic have received training in neonatal surgery centers in Astana (Kazakhstan), the pediatric surgery center of Stavropol Medical University (Russia), Severans clinics of Yonsei University and Samsung Hospital (South Korea), and the National University Hospital (Singapore) between 2016 and 2019. In return, specialists from Russia, Kazakhstan, and South Korea have visited the clinic and conducted "Master classes" on performing endosurgery. Memoranda of Mutual Collaboration have been signed between Samsung Hospital, National University Hospital (Singapore), and the Multidisciplinary Pediatric Surgery Centre at Samarkand State Medical University (2nd Clinic).

## Food & Accommodation

Samarkand State Medical University offers four dormitories with the capacity to accommodate 1,300 students. These dormitories, located at 37 Dagbitskaya Street (Dormitory No. 1), 41 Dagbitskaya Street (Dormitory No. 2), and 31 & 31/A G. Jamshid Street (Dormitories No. 3 and No. 4), cater to the needs of both local and international students from countries such as Korea, India, and Pakistan. Each dormitory is equipped with university library branches containing over 3,000 essential literary works, providing all students with easy access to these resources. To enhance students' living conditions and cultural leisure, every floor features refrigerators, TV sets, and modern furnishings in all rooms. A state-of-the-art heating system ensures the dormitories remain comfortable during winter months. Students also have access to showers and laundry facilities on each floor, with modern washing machines and gas ovens available for use. Furthermore, all dormitories feature contemporary computer rooms with Wi-Fi and internet connections. Each dormitory houses "Rooms of Spirituality," which are equipped with necessary tools and visual aids, allowing students to engage in spiritual and educational activities during their free time. The University's Spirituality and Education Department, the Youth Union of Uzbekistan's primary organization, the Women's Advisory Council, faculties, and departments frequently organize programs and round tables on various topics in the dorms' Spirituality Rooms. Additionally, Indian mess halls are available in the dorms, where students can enjoy authentic Indian cuisine prepared by Indian chefs at affordable prices. Students utilizing the mess facilities receive nutritious, protein-rich Indian meals three times a day, contributing to their optimal physical and mental health.
